SUMMARY

Principal Product Manager with 10+ years in marketplace, loyalty, and consumer care products. Led retention strategy, built compliance infrastructure, and shipped zero-to-one features across food delivery, grocery, and alcohol verticals. Known for translating ambiguous business problems into measurable product decisions and driving alignment across engineering, legal, finance, and operations.

EXPERIENCE

Grubhub

Boston, MA

Principal Product Manager, Care *Diner retention strategy, self-service, and care tooling.*

2025 – Present

- Defined a retention-focused P&L measurement model translating 30-day reorder rate improvements into estimated orders and revenue saved, enabling the Care org to benchmark investment in diner retention against acquisition and marketing spend for the first time.
- Drove a strategic shift from fully reactive care toward proactive intervention, including a proactive late-delivery credit feature that improved 30-day diner retention 328 bps and reduced inbound contact rate on late orders ~200 bps per difference-in-differences analysis.
- Championed integration of a consumer segmentation platform into Care systems, cutting experiment setup time by 50% (~2 weeks) and unlocking 50+ targeting criteria to accelerate personalized retention treatments.

Grubhub

Senior Product Manager, New Verticals Supply *Scaled Grubhub's marketplace into grocery, alcohol, and retail.*

2022 – 2024

- Architected and shipped Weighted Items for per-pound grocery pricing, coordinating across 100+ stakeholders spanning engineering, legal, compliance, merchant ops, and catalog infrastructure to deliver a zero-to-one capability that unblocked 40% of Grocery merchant TAM.
- Built the Alcohol Merchant Validator, a compliance system covering all U.S. markets with state-, county-, and city-level rules that automatically suppresses alcohol listings for non-compliant merchants while keeping non-alcohol menus live. Now the compliance backbone for 8,500+ alcohol merchants and ~1.2M annual orders, replacing a manual process that consumed ~10 hours/month of compliance team time.
- Cut new alcohol market launch time by 50% by redesigning the GTM playbook and aligning Legal, Compliance, and Merchant teams, saving 28 total weeks while expanding alcohol availability from 8 to 22 states.
- Sourced and secured City Hive integration to overhaul alcohol merchant catalog quality, boosting Add-to-Bag Rate by 432 bps, growing menu depth 367%, and lifting image coverage from 5% to 95%.
- Drove 27% order growth across key retailers by modernizing catalog infrastructure, enabling 15K+ item menus with images and dynamic updates.

Grubhub

Senior Product Manager, Agency *Improved retention and insights for white-label ordering.*

2020 – 2021

- Lifted reorder rate by 12% by designing and launching a modern points-based rewards system for Smoothie King and other QSR brands.
- Recovered an estimated 6+ weeks of roadmap capacity by implementing GA4 + mParticle event tracking, eliminating sprint derailments caused by misprioritized bug investigations.
- Embedded funnel and engagement analytics into enterprise client onboarding for KFC and Just Salad, reducing time-to-first-insight and strengthening 90-day account retention.

Dunkin' Brands

Canton, MA

Product Manager, Web and Mobile *Loyalty and conversion for mobile ordering.*

2018 – 2019

- Grew loyalty membership 38% YoY by decoupling rewards from stored-value cards, enabling credit card and cash-based participation.
- Increased mobile order conversion 725 bps by launching Guest Checkout, reducing sign-in friction for first-time app orderers.
- Improved attribution and data quality by implementing mParticle CDP across digital channels and marketing systems.

Beverage Media Group (Acquired by Provi)

Cambridge, MA

Head of Product, BevSites *Scaled retailer eComm platform through integrations and UX.*

2012 – 2017

- Grew customer base from 10 to 400 and doubled onboarding velocity from 25 to 50 retailers/year by streamlining setup and sales operations.
- Increased average client revenue 73% between first and final year by improving item discovery, checkout UX, and marketing integrations.
- Built 18 POS system integrations to automate inventory sync and reduce ordering friction for wine and spirits merchants.

SKILLS & TOOLS

- **Retention & Growth Strategy** – Diner lifecycle analysis, churn signal frameworks, proactive intervention design, cohort modeling.
- **Data & Analytics** – SQL, A/B testing, difference-in-differences analysis, funnel optimization, ROI/ROAS modeling.
- **AI & Applied ML** – LLM-powered product development; built Beverly Civic Assistant (jameslaurenti.com), a local civic information tool that aggregates fragmented public data to keep residents informed on planning, budgeting, and city governance.
- **Growth & Martech** – Product analytics, engagement tracking, and attribution via Google Analytics, mParticle/Segment, and Braze/Iterable.
- **Product Operations** – Agile, Jira, Asana, cross-functional stakeholder management across legal, compliance, finance, and engineering.

EDUCATION

Boston University

Boston, MA

Bachelor of Arts, Classical Civilization + Ancient Greek and Latin

2002 – 2006

Graduated Summa Cum Laude • Phi Beta Kappa
